Given the advantages of electronic money, you might think that we would move quickly to the cashless society in which all payments are made electronically. __1__ a true cashless society is probably not around the corner. Indeed, predictions have been ___2___ for two decades but have not yet come to fruition. For example, Business Week predicted in 1975 that electronic means of payment would soon "revolutionize the very ___3___ of money itself," only to ___4___ itself several years later. Why has the movement to a cashless society been so ___5___ in coming?

1. [A] However [B] Moreover [C] Therefore [D] Otherwise

2. [A] off [B] back [C] over [D] around

Given the advantages of electronic money, you might think that we would move quickly to the cashless society in which all payments are made electronically. __1__ a true cashless society is probably not around the corner. Indeed, predictions have been ___2___ for two decades but have not yet come to fruition.
